RISKS

The general risks relevant to the Scheme are detailed on pages 26 - 28 of the PDS. In addition to the risk described in the PDS, the following are risks specific to the investment offered under this SPDS:

- (1) **Construction Funding is not obtained.** The borrower has an indicative offer from a major bank to provide the construction funding for the Project subject to a satisfactory level of presales being achieved. In the event such funding is not forthcoming within the loan term, this may impact on the timing of repayment of the Facility and ultimately, the Investor's investment.
- (2) **Illiquid Investment.** Investors will have a proportional beneficial interest in the mortgage securing the subject properties. The lender is not obliged to redeem any investment on or before the maturity date of this loan. Repayment of investor capital and capitalised interest is dependent entirely on the performance of the borrower in repaying this facility with the loan term. Investors should treat this investment as illiquid.
- (3) There may also be a delay in selling or refinancing the Property due to market conditions. Both these events may impact on the timing of repayment of the Facility and ultimately, the Investor's investment.
- (4) Investors may not receive their final interest payments if the Facility is not repaid in full at the time of maturity of the loan. Investors may be required to wait until the property is sold before they will be paid their interest payments or receive a return of their capital.
- (5) If the Borrower defaults under the Facility and Guardian Securities is required to exercise its power of sale under the mortgage, interest payments and return of capital to investors may be delayed or lost totally.

- (6) In the event that Guardian Securities exercises its powers under the mortgage, priority repayment from sale proceeds (after GST and selling costs) will be in the order of:
 - (a) Legal and recovery costs incurred by Guardian Securities;
 - (b) Payment of Investor capital;
 - (c) Payment of Investor interest at the lower interest rate; and
 - (d) Payment of interest to investors on the difference between the lower interest rate and the higher interest rate.
- (7) Return of capital and payment of any interest payments that have been deferred until sale of the Property are dependent upon the receipt of the ultimate proceeds of sale.
- (8) There is a risk that the proceeds of sale do not repay the Facility and/or outstanding interest, in which case, Investors may not be repaid their initial capital investment. Any loss incurred by Investors will be on a pro-rata basis to their investment in this mortgage.
